MiFleet Drive for Small Business

The MiFleet Drive App is an easy-to-use mobile application that gives you the ability to simply locate, track and receive important vehicle information from virtually anywhere in the world. Easily monitor your vehicles health, current location, speed, and driving habits from your fingertips. Whether it's the ability to know the current health of your vehicle, or to keep your drivers safe and monitor their driving habits, MiFleet Drive app is the solution you're looking for.

Real-Time Location and Trip Information

Monitor the usage of small business vehicles remotely to ensure all trips are safe. Know when and where your vehicle has been with trip reporting.

Driver Behavior Alerts

Be notified when speeding events, harsh braking and excessive acceleration occurs. Coach drivers to ensure that vehicle conditions are safe.

Monitor Vehicle Health

Be alerted to maintain your vehicle when the check engine light comes on. Quickly maintain vehicle issues by alert codes to ensure longevity of vehicle.

Real-Time Alerts & Notifications

Receive alerts with custom geofence boundaries around frequent arrival locations. Get instantly notified once vehicle enters or exits those geofences.
