

FEATURES

- FEDERAL COMPLIANCE
- SIMPLIFIES INSPECTIONS
- DATE STAMP EVENTS
- CERTIFICATION OF RECORDS
- CLOUD-BASED STORAGE
- VEHICLE ID
- DRIVER LOG ON/OFF
- COMPLIANCE

Bring ELD compliance to your fleet

This device and platform are used to electronically record a driver's Record of Duty Status (RODS) ultimately replacing the paper logbook some drivers currently use to record their compliance with Hours of service (HOS).

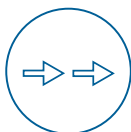

Federal Compliance

By having this solution big rig fleets can keep up with federal regulations mandating that companies keep track of hours of operations, miles driven, and driver logged on / off. Drivers and fleet managers can quickly and easily pull records during an inspection limiting unnecessary time spent looking for paperwork or handling paperwork. Reduces paper tracking and makes it electronic.

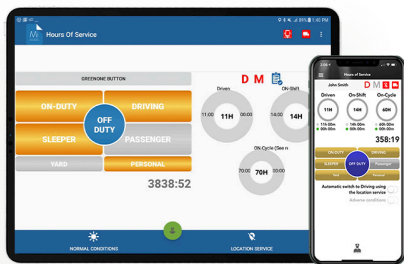

Cloud-based Storage

Store your compliance records on the cloud and access them anytime you need them. Makes for easy inspections or audits.

Simplifies Process

Compliance is easy by having all ELD records electronically processed and stored, roadside inspections are quicker so they can get back to driving.

MiFleet ELD solution provides federal compliance on HOS. Contact sales@[mifleet.us](mailto:sales@mifleet.us) for more information.
