- SPEED MONITORING
- REAL-TIME DATA
- TRACK DRIVER PROGRESS
- REDUCE SPEEDING

Protect your Drivers. Protect your Fleet.

Designed around the simple driver behavior that has the greatest impact on safety and performance, SpeedGauge motivates drivers, empowers managers, and provides accountability. Using SpeedGauge, fleets have access to a range of features for tracking and managing vehicle speed trends and driver behavior — the number one factor affecting safety and fuel economy.

Improve Fleet Safety

Reduce driving behaviors that lead to speeding violations and accidents. See when and where drivers are speeding — identify at-risk drivers and reduce speeding incident frequency.

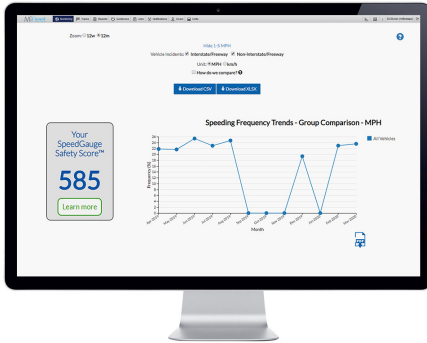

Improve Driver Performance

Reduce at risk driving behaviors which most frequently lead to accidents and speeding violations on the road by coaching drivers with accurate location and vehicle performance information.

Reduce Unnecessary Expenses

By monitoring speed you can reduce fuel prices, speeding tickets, accidents, and rising insurance premiums. Bad driver behavior can cost you thousands in vehicle maintenance repairs and vehicle replacements.

MiFleet SpeedGauge solution reduces driver speeding behaviors. Contact sales@mifleet.us for more information.
