

Protect your commercial fleet, drivers and your business.

MiFleet offers piece of mind with its fully integrated dash cam monitoring solution into its comprehensive fleet management application. Video footage of your fleet's performance is continuously recorded until a harsh driver behavior triggers a video clip of before and after the event to be transmitted for remote monitoring. MiFleet + Vision offers operations managers the evidence and training tools to coach its drivers and protect the fleet from false claims.

How It Works

Easy as 1. 2. 3.

Features & Benefits

Discover the power of a Dash Cam.
