

Work smarter and focus more time on your patients.

Healthcare workers can spend up to 25% of their time simply searching for equipment. MiFleet provides a standalone asset management platform to allow quick location data of mission critical medical devices. You can easily set a geofence area to give you instant notifications via email or text message that the equipment has left its geofence boundary. Administrative staff will be able to track the location of the equipment for quick device location and recovery.

25%

Time Savings

60%

Increase in Equipment Utilization

50%

Recovery Increase

Location of mission critical medical devices.

Equipment Location Management

MiFleet leverages location-based intelligence to give you near real-time visibility into the location, status, and utilization of all medical equipment.

Motion Detection

Movement of equipment wakes the device causing a location report to be sent alerting you of the possibility of the equipment being relocated or stolen.

Alerts & Notifications

SMS & Email Notifications can alert you of equipment movements within your facility, as well as alert you when removed from your facility using custom Geofence boundaries.

Theft Recovery

Create geofence areas around your facility to get notified when one of your equipment assets leaves the area to quickly track and locate the stolen equipment.

Recommended MiFleet Solutions
