

## FEATURES

- CROP ROTATION
- CROP CATALOGING
- OPERATIONS HISTORY
- CULTIVATION SEARCH & APPROVAL
- FUEL CONSUMPTION MONITORING
- CALCULATION OF FIELD AREA
- OVERLAP & OMISSION VISUAL DATA
- MONITOR DRIVERS, UNITS, & TRAILERS
- EQUIPMENT STATUS REPORTING

MiFleet Hecterra solution maximizes farming capabilities. Contact [sales@mifleet.us](mailto:sales@mifleet.us) for more information.

## A Solution for Agribusiness

This is a simple yet effective application for the agro-industry, which allows controlling field works based on telematics data. The solution delivers transparent data about fields, crops, and field operations to the employees and managers of agricultural enterprises. Having the exact information about who, when, and how was cultivating the crops, the clients can effectively plan and improve the agribusiness processes.

### Integrated Into MiFleet

Manage all your vehicles and farming equipment in one location. Hecterra is already integrated into MiFleet for complete visualization.

### User Friendly

Platform is intuitive for easy use. Predetermined settings are available to get you and your farm up and running quickly.

### Detailed Reporting

Easy reports generation by drivers, fields, operations, or units. CSV import option provides details on fields, crops, operation, and time.

### Vehicle and Driver Controls

Using drivers, units, and trailers created in MiFleet. Calculations of fuel consumption, speed, mileage for each field cultivation.
