Increase Fleet Utilization

SOFTWARE BENEFITS

- Location Information**
Receive up to the minute location information to validate customers are being serviced by your technicians.
- Location Sharing**
Service Technicians can invite customers to monitor their ETA via SMS Message.
- Increase Productivity**
Monitor your technicians time at each job, providing the ability to optimize your technicians daily service calls.
- Validate Job Times**
Monitor actual job time at locations, versus reported times by technicians.
- Record Vehicle Usage**
Determine company vehicle usage reports during non-work hours.

RECOMMENDED MIFLEET SOLUTIONS

SERVICE AND TRADES INDUSTRY
INCREASE EFFICIENCY & PRODUCTIVITY

LIGHT DUTY

A continuously recording Dash Cam where event-based HD (1080p) video clips are auto-uploaded to a video management web application. Excellent for driver training, fraud and exoneration.

LIGHT DUTY

Pickup Trucks, Passenger Vehicles & Utility Vans can be equipped with an OBDII Plug'n Play or 3-Wired Covert installed GPS Tracking Device offering location, vehicle diagnostics & driver behavior.

SOLAR TRACKER

Asset Tracking at its finest with a sophisticated solar tracking solution for assets that lack a power source and are typically hard to access. Pings received daily and up to the minute when in motion.

ASSET TRACKER

Location management of both powered and unpowered assets such as construction equipment, trailers, cargo containers & more. Pings received daily and up to the minute when in motion.

POWER TAKEOFF

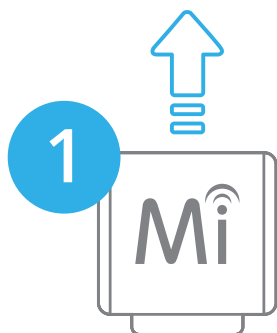

Monitoring of powered equipment such as rental equipment, construction equipment and more. Confirm where equipment is located and hours of use for maintenance and invoicing.

STARTER INTERRUPT

Install a Starter Interrupt on your vehicles and equipment to limit when it can be used. MiFleet can monitor your equipment and even its ability to operate manually or on a defined schedule.

HOW IT WORKS

Purchase & Install an OBD-II Plug'n Play or Covert Light Duty Vehicle Monitoring Device.

Driver Behavior, Vehicle Performance & Location Information is automatically sent to our Cloud Servers.

Remotely monitor harsh usage of vehicle, engine diagnostics and location information on our Web Application.
