Reporting Frequency: 60 minute reporting while on internal battery, increases to 30 seconds when in motion and on power.  
Installation Time: <20 Minutes

The MF2830 high value asset tracker features a small size, superior GPS performance and a 5.2Ah internal-rechargeable battery. The MF2830 is a complete asset/vehicle and communications device incorporating next-generation, super sensitive GPS technology on cellular networks for installation on any 12 / 24 volt powered vehicle, asset or equipment. The superior internal cellular and GPS antennas eliminate the need for external antennas making the MF2830 mountable virtually anywhere.

### Vast Usage

Use on any 12 / 24 volt powered equipment or vehicle.

### Equipment Usage

Monitor vehicle location and usage behaviors.

### Theft Prevention

High Value Asset Tracker when paired with a Starter Interrupt Kit.
