

FEATURES

- » SOLAR POWERED WITH 4 MONTH BATTERY LIFE
- » IP67 RATING
- » LONG TERM INSTALLATIONS
- » REAL-TIME MONITORING
- » ALERTS/NOTIFICATIONS
- » ADDITIONAL SENSORS AVAILABLE

BENEFITS:

- Location Management
- Save Time
- Increase Asset Utilization
- Lot Maintenance Monitoring

NETWORK CONNECTIVITY:

- Variant I: CAT-1 (AT&T)
- Bands: 2,4,5,12,13

CERTIFICATIONS:

- FCC, CE, IC, PTCRB, RCM

OPERATIONAL SUMMARY:

- Reporting Frequency: 1 minute GPS sampling and 10 minute upload.
- Installation Time: <20 Minutes

The MF603 is an asset tracker providing real-time visibility into trailer and container tracking through the use of solar powered technology. Access true data, GPS location, and device communication instantly when utilizing this unique IP67 rated device. Fleet managers have complete transparency of location, speed and battery level percentage. The MF603 is a great solution for long-term deployments, extreme weather conditions, or trailer lot maintenance monitoring for all size fleets and managers.

Vast Usage

Use on any non-powered equipment or vehicle.

Asset Usage

Increase Asset Utilization through increase visibility.

Temperature Monitoring

Receive instant notifications when you transport is out of range.
