24HR Reports
24HR Reports (with 5 Min Motion Reports)
Installation Time: <20 Minutes

The MFL100 is a personal tracker that is a battery operated, rechargeable tracker designed for reliable, short term deployments. The personal tracker is an ideal solution for those looking to manage assets and personnel inconspicuously. The extremely small form factor and rechargeable, internal battery, allow the device to be installed, carried, or hidden away for days, weeks, or months at a time. Then it can be charged easily through a USB cable for uninterrupted service or used for extended amounts of time. The MFL100 provides location information to assist in higher personnel and asset utilization decision and equipment location.

Vast Usage

Use on any non-powered equipment or vehicle.

Asset Usage

Increase Asset Utilization through increased visibility.
