

FEATURES

- » SOLAR POWERED
- » IP67 / IP65 COMPLIANT
- » LONG TERM INSTALLATIONS
- » REAL-TIME MONITORING
- » ALERTS/NOTIFICATIONS
- » TEMPERATURE SENSOR AVAILABLE

BENEFITS:

Location Management
Save Time
Increase Asset Utilization
Lot Maintenance Monitoring

NETWORK CONNECTIVITY:

Variant I: LTE CAT M1

CERTIFICATIONS:

FCC, PTCRB, IC, CE (RED)

OPERATIONAL SUMMARY:

Reporting Frequency: 30 Mins Report
/ 1 Day
Installation Time: <10 Minutes

The MF4950 is a powerful solar GPS telematics tracker can be used for various solutions like logistics management, monitoring the cold/supply chain, agriculture, construction with trailers, containers, and other assets. Its rugged design prevents potentially risky breakage and leaks by the external environment. Minimized power consumption and high solar charging efficiency provide long battery life in its class.

Vast Usage

Use on any non-powered equipment or vehicle.

Asset Usage

Increase Asset Utilization through increase visibility.

Temperature Monitoring

Receive instant notifications when your transport is out of range.
