Protect your commercial fleet, drivers and your business.

With MiFleet + Vision, fleet managers and businesses can monitor their vehicles during all driving activities. At ignition on, video recording begins, allowing for remote live real-time camera views or for historical event recording before and after a triggered event occurs. MiFleet + Vision offers fleet managers and businesses the evidence and training tools to coach its drivers, maintain a safe

MiFleet +Vision solution provides in-vehicle video monitoring. Contact sales@mifleet.us for more information.

Improve Fleet Safety

Reduce driving behaviors that lead to speeding violations and accidents. See when and where incidents occur — identify at-risk drivers and reduce incident frequency.

Evidence Review

Review recorded footage from the storage device or from the cloud-based app. Evaluate times, locations and other pertinent incident information.

Report Statistics

MiFleet +Vision's intuitive alarm reporting allows you to view triggered events and the data associated with them such as time, location, driver, speed and live view.
