

FEATURES

- DELIVERY STATUSES AND CALL TO A CLIENT
- YOUR ROUTE IS ALWAYS AT HAND
- DETAILED DESCRIPTION ON ORDERS
- COMMENTS AND PHOTOS
- CHATTING WITH THE DISPATCHER

Simple and effective delivery management solution

The service allows to perform a wide range of tasks in the area of logistics and delivery – transportation arrangements, delivery route optimization and cost saving. Logistics comprises a web-version for dispatchers and a mobile application for drivers. Web-version ensures effective operating procedures management: order placement, planning and distribution, Google Maps-based routing, delivery process monitoring and coordination. Logistics mobile app is designed for delivery men and mobile employees.

Orders

Create or import orders with the detailed description.

Delivery route planning

Select orders and vehicles and get preliminary routes comprising data on the estimated arrival time and mileage. Use Google Maps data for precise address info and routing.

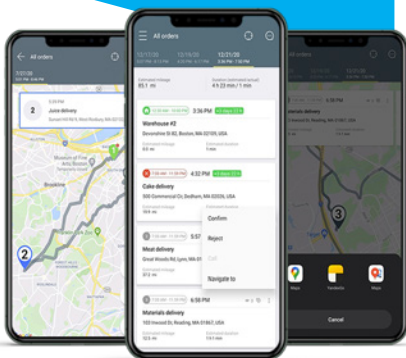

Delivery process monitoring

Track the delivery process in real-time mode and respond to emerging issues through phone calls or chatting with the driver.

Reports and notifications

Get analytics from reports and communicate with clients by e-mail notifications with built-in HTML editor.
