

VIDEO TELEMATICS

IMPROVE FLEET SAFETY

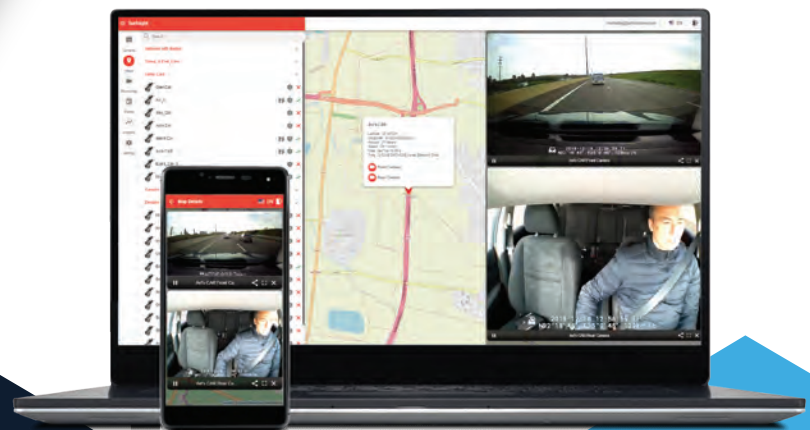

A POWERFUL & EASY TO USE VIDEO TELEMATICS SOLUTION

Help your customers keep their drivers and vehicles safer while streamlining their day-to-day operations and reducing costs. Our video telematics solution provides valuable video insights and advanced risk detection tools to help improve fleet safety and efficiency.

The innovative technology in our wide selection of dashcams utilize robust machine vision and artificial intelligence to proactively detect and mitigate risk. Help reduce risk with a proven approach that has helped hundreds of thousands of drivers navigate millions of miles safely for more than 20 years.

The solution is easy to use, accessibly priced, and works for any vehicle class. Help your clients jumpstart fleet safety and protect their bottom lines.

FEATURES & BENEFITS

In-Cabin and Road-Facing Camera

Video captures in-cabin and road-facing footage to help provide a complete picture of the drive.

Proactive Learning

Drivers receive visual and audio alerts, in real-time, when they are engaged in risky behaviors so they can self-correct before an accident occurs. Awareness of their driving habits empowers drivers to develop safer ones over time.

Easy Setup

The lightweight device is easy to install thanks to a user-friendly interface and setup process. Your clients can be up and running in as few as 10 minutes.

Live Streaming

See what's happening in the cab and on the road in near real-time*. Empower managers to make quick decisions and provide immediate assistance.

Affordably Priced

Increase revenue by offering your customers a cost-effective video solution. Priced to be accessible for any size fleet, while providing unbeatable technology, high-quality video, and accurate data.

Continuous Recording

The camera detects movement and continuously records while the vehicle is in motion. Video can be retrieved from the cloud for up to 30 days.

VIDEO TELEMATICS
IMPROVE FLEET SAFETY

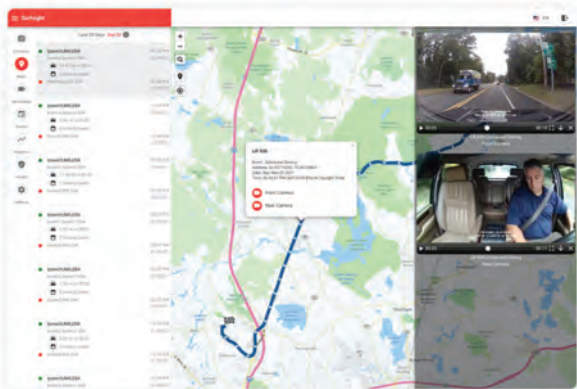

Proactive alerting & advanced technology

Advanced MV+AI alerts drivers of risky behaviors in real-time so they learn to self-correct. This helps drivers form better awareness and safer driving habits, resulting in fewer risky incidents. Fleet managers can use video events for further driver coaching and training, as well as rewards programs to recognize good driving behaviors.

Intuitive Solution

Thoughtfully designed for ease of use, the intuitive cloud-based dashboard makes it easy to configure settings and retrieve valuable driver safety and trip data. Manage multiple vehicles from a single screen with the ability to group vehicles, bookmark selected cameras, generate reports, review analytics, update permissions and access, and more.
